DETAILED ACTION

Allowable Subject Matter

1. Claims 39-55 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As to claim 55, as best understood, Dannath (DE 90 10 431) in view of Popovski (US 6,764,245) and Gogarty (US 5,199,836) disclose the claimed adjustable clamping assembly with the exception of wherein the first and second objects are positioned such that the first channel and the second channel and the openings thereof are aligned, the first channel having a first cutaway region disposed at an intermediate location of the first channel distal the opening of the first channel and defining front and rear portions of the first channel; wherein the head portion has a first position of use wherein the opposing lateral surfaces are generally aligned with sidewalls of at least one of the first channel and the second channel such that the head portion is prevented from rotating as the gear member is rotated in a first direction to translate the elongate connecting portion within the first channel and the second channel; wherein the head portion has a second position of use wherein the gear member is rotated in a second direction to rotate the head portion such that the opposing lateral surfaces are positioned at an angle relative to the side walls of at least one of the first channel and the second channel and such that the at least a first lug is positioned within a second cutaway portion of the second channel; and wherein actuation of the gear member in the second direction translates the elongate connecting portion such that the threaded portion of the elongated connecting portion extends into the rear portion of the first channel and such

Art Unit: 3679

that the head portion, which is oriented in the second position of use, moves longitudinally toward the first object, pulling the first and the second objects together.

There is no teaching or suggestion, absent the applicant's own disclosure, for one having ordinary skill in the art at the time the invention was made to modify the assembly disclosed by Dannath in view of Popovski and Gogarty to have the above mentioned elemental features. Furthermore, such modifications would yield unexpected and unpredictable results.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
